

Your site. Our starting point.

This guide helps you prepare for the first discussion. Share the information you have; open questions can be addressed together.

01 / Project and contact

Company, contact person, country and project location; system of interest; project stage and timeframe.

02 / Water demand and climate

Daily and seasonal water demand, intended use, existing water sources; temperature and relative humidity throughout the year. Particularly relevant to BlueVANTAGE.

03 / Energy and infrastructure

Power and heat demand, grid connection, generation, available fuels, installation space, access and potential storage.

04 / Operation and local conditions

Responsible operators, maintenance resources, local approvals, water quality and existing technical documentation.

05 / Additional systems and pilot projects

RailGUARD: level crossing, road traffic, existing protection and responsible infrastructure operator.
AlpSNOW: bounded test area, terrain, temperatures and local operator.

Next step

Send your initial information to agnes.horvath@pyrametec.com. Together with you and LCG, we will define the scope of an initial site and feasibility assessment.
